"I need to know my itinerary is physically manageable before I begin the trip."

GOALS

- Visit historical & cultural sites
- Avoid long walks and rushed days
- Get dependable accessibility details

FRUSTRATIONS

- Generic plans assume long walking ability
- Accessibility information is often missing
- Crowded schedules cause exhaustion

What our app must provide: Accessibility filters · Shorter routes & rest time · Confidence warnings

Michael loves history and museums, but a knee condition limits how far he can walk in a day. He avoids booking trips because he can't tell in advance whether a plan will be manageable. He needs walking limits respected and honest warnings when accessibility data is uncertain.
